Within the UK it is no secret that the weather is unpredictable. With this in mind, there is no better time to introduce a new, warm and economical stove.

At Carron Heating we pride ourselves on supplying high quality products at competitive prices; there is no exception with the Carron ECO 5kW 2022 Stove. The contemporary design of the ECO 5kW 2022 Stove features an innovative side handle and also includes the following benefits:

Wood Burning/ Multi-Fuel Option: The Carron ECO 5kW 2022 Stove is available with a multi-fuel option meaning the stove can not only burn wood, it can also burn smokeless mineral fuel. Ordinarily, wood burners are designed to have a fixed grate and no ashpan, as wood burns best on hot ashes. The multi-fuel option incorporates a raised grate aiding the combusted air to flow underneath the fuel for effective burning. This design also allows the easy removal of ash from below by using a removable ashpan. The Carron multi-fuel kit is available for £90 inc VAT.

ECO Design Compliant: As part of the Clean Air Strategy, the UK Government has introduced ECO Design regulations, effective from 01 January 2022 to help reduce the impact heating appliances have on our environment. This means stricter guidelines in place to limit Particulate Matters, Organic Gaseous Compounds, Carbon Monoxide and Nitrogen Oxide. Only those appliances that have been tested and verified as meeting these new requirements are able to be sold and installed in the UK. The Carron ECO Stove is rated as 'Highly Efficient' at 78.6%.

Designed and Tested In The UK: The Carron ECO 5kW 2022 Stove was designed in rural Lincolnshire specifically for the UK market and was tested, inspected and certified by Kiwa (specialist in high quality verification processes). This has enabled Carron to understand the customers needs and ensured the stove is suitable for use within smoke control areas. DEFRA is the governing body and their recognition means the stove is legally allowed to burn specified fuels in smoke controlled zones.

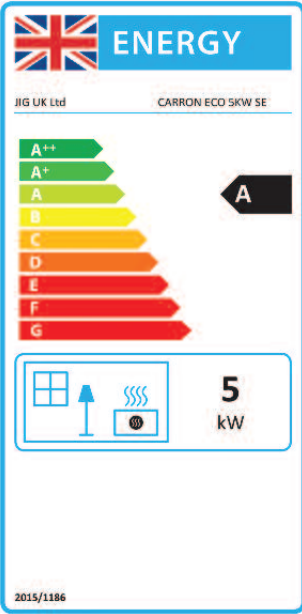

Cleanburn Technology: The Carron ECO 5kW 2022 Stove has cleanburn technology that allows preheated air to be reintroduced to help prevent the glass becoming dirty and blackened. Combined with a large picture window, this allows your customer to relax and see the hypnotic flames.

Colour Options: The Carron ECO 5kW 2022 Stove is available in 6 enamel colours including cream, ash grey, antique, sage green, black and red and additionally matt black. With each stove there is an option to purchase a colour-matching flue pipe. These start from £80.50 inc VAT.

Stove Spares are available at: www.carronspares.co.uk

Warranty
Carron Stoves are supplied with a 3 year warranty. This warranty does not cover items considered consumables. These items include door glass, fire bricks, fire rope and grates. The use of incorrect fuels would invalidate this warranty. This appliance must be installed by a HETAS engineer. Proof of purchase and certificate of installation would be required in the case of a warranty claim. Due to limitations of the printing process, colour reproduction of enamel stoves may vary slightly from those shown. Please consult your local stockist for more accurate colour matching. Occasionally the enamel finish can show a crazing/cracking effect on the surface of the stove during use. This effect will normally lessen as the stove cools and should not be considered a defect. This crazing effect can be made worse by incorrect fuel or over-fueling.

Stove Features
Designed And Tested In The UK
Stove Construction - Cast Iron
Approved For Use In Smoke Control Areas
3 Year Guarantee - T&Cs Apply
Highly Efficient - Meaning More Economic To Run
Large Picture Window - See The Hypnotic Flames
